

IT25102813 Abivarsan Y.

OOAD Lab 1

SE 2012

<https://github.com/IT25102813/SE2012-2025-S2-L01.git>

Exercise 1

```
import java.util.Scanner;

public class Welcome{

    public static void main(String[] args){

        Scanner scanner = new Scanner(System.in);

        //Getting input - first name

        System.out.print("Enter your first name ");

        String f_name = scanner.nextLine();

        //Getting input - last name

        System.out.print("Enter your last name ");

        String l_name = scanner.nextLine();

        //printing output

        System.out.printf("Welcome to Second Year %s %s\n", f_name, l_name);

        scanner.close();

    }

}
```

Output

Enter your first name Abivarsan

Enter your last name Yogeswaran

Welcome to Second Year Abivarsan Yogeswaran

Exercise 2

```
import java.util.Scanner;

public class marks{

    public static void main(String[] args){

        Scanner scanner = new Scanner(System.in);

        System.out.print("Enter number of students: ");

        int num_of_students = scanner.nextInt();

        int[][] marks_array = new int[num_of_students][3]; //[1] - Mathematics
                                //[2] - Chemistry
                                //[3] - Physics

        int choice;

        do{

            System.out.print("Subject ID\n1. Mathematics\n2. Chemistry \n3. Physics\n");

            System.out.print("\n-----Menu-----\n");

            System.out.print("1. Add Marks of Student\n");

            System.out.print("2. Update Marks of Student\n");

            System.out.print("3. Get Average of a Subject\n");

            System.out.print("4. Get Average of Student\n");

            System.out.print("5. Get total marks of Student\n");

            System.out.print("6. Exit\n");
```

```
marks_array[student_id][subject_id] = scanner.nextInt(); //Subject didn't
get selected directly by the user, so it is let to start
from 0
```

```
}
```

```
break;
```

case 2:

```
System.out.print("\nEnter Student ID: ");
```

```

average_of_subject);
            break;
        }
    break;

case 4:
    System.out.print("\nEnter the Student's ID, you want to find the average of: ");
    student_id = scanner.nextInt() - 1;

    total_marks = 0;

    for (int i = 0; i < 3; i++){
        total_marks = total_marks + marks_array[student_id][i];
    }

    float average_of_student = (float) total_marks/3;

    System.out.printf("\nAverage of student %d is %.2f\n", student_id + 1,
average_of_student);
    break;

case 5:

```

```

        System.out.print("\nEnter the Student's ID, you want to find the average of: ");

        student_id = scanner.nextInt() - 1;

        total_marks = 0;

        for (int i = 0; i < 3; i++){
            total_marks = total_marks + marks_array[student_id][i];
        }

        System.out.printf("\nTotal Marks of Student %d is %d \n", student_id + 1, total_marks);

        break;

    case 6:
        break;

    }

}while (choice !=6 );

        scanner.close();
    }
}

```

Output

Enter number of students: 2

Subject ID

1. Mathematics

2. Chemistry

3. Physics

-----Menu-----

1. Add Marks of Student
2. Update Marks of Student
3. Get Average of a Subject
4. Get Average of Student
5. Get total marks of Student
6. Exit

Enter your choice: 1

Enter Student ID: 1

Enter Marks for Mathematics: 56

Enter Marks for Chemistry: 76

Enter Marks for Physics: 65

Subject ID

1. Mathematics
2. Chemistry
3. Physics

-----Menu-----

1. Add Marks of Student
2. Update Marks of Student
3. Get Average of a Subject
4. Get Average of Student
5. Get total marks of Student
6. Exit

Enter your choice: 2

Enter Student ID: 1

Enter Subject ID: 2

Enter New Marks: 70

Subject ID

1. Mathematics

2. Chemistry

3. Physics

-----Menu-----

1. Add Marks of Student

2. Update Marks of Student

3. Get Average of a Subject

4. Get Average of Student

5. Get total marks of Student

6. Exit

Enter your choice: 5

Enter the Student's ID, you want to find the average of: 1

Total Marks of Student 1 is 191

Subject ID

1. Mathematics

2. Chemistry

3.Physics

-----Menu-----

1. Add Marks of Student
2. Update Marks of Student
3. Get Average of a Subject
4. Get Average of Student
5. Get total marks of Student
6. Exit

Enter your choice: 1

Enter Student ID: 2

Enter Marks for Mathematics: 90

Enter Marks for Chemistry: 89

Enter Marks for Physics: 88

Subject ID

1. Mathematics
2. Chemistry
- 3.Physics

-----Menu-----

1. Add Marks of Student
2. Update Marks of Student
3. Get Average of a Subject
4. Get Average of Student

5. Get total marks of Student

6. Exit

Enter your choice: 4

Enter the Student's ID, you want to find the average of: 2

Average of student 2 is 89.00

Subject ID

1. Mathematics

2. Chemistry

3. Physics

-----Menu-----

1. Add Marks of Student

2. Update Marks of Student

3. Get Average of a Subject

4. Get Average of Student

5. Get total marks of Student

6. Exit

Enter your choice: 2

Enter Student ID: 2

Enter Subject ID: 2

Enter New Marks: 95

Subject ID

1. Mathematics
2. Chemistry
3. Physics

-----Menu-----

1. Add Marks of Student
2. Update Marks of Student
3. Get Average of a Subject
4. Get Average of Student
5. Get total marks of Student
6. Exit

Enter your choice: 4

Enter the Student's ID, you want to find the average of: 2

Average of student 2 is 91.00

Subject ID

1. Mathematics
2. Chemistry
3. Physics
